Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 112

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 9-10, the expression "roughly horizontally" is confusing; also, lines 13-14, the two expressions "(with the lower tunnel filling)" and "(with the upper tunnel filling)" appear to be redundancy.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Targiroff et al. U.S. Patent 6,298,970.

Targiroff disclosed a structure comprising a rigid frame (aircraft) and a ramp, the ramp is constructed of flexible material (inflatable material), and is stretched tight on the rigid frame, a climbing portion of the ramp has footholds (24) and a sliding portion of the ramp is smooth (see Fig. 2) (applicant's claim 1). The rigid frame (aircraft) is considered as a playroom with a horizontal floor level with the top of the ramp, the playroom being largely open to the top of the ramp for most of the width of the ramp, the playroom being closed elsewhere (applicant's claim 7)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Targiroff et al.

The sliding portion of Targiroff et al made from a frictional resistance material such as polyurethane coated nylon (see column 4, line 28). It is noted that Targiroff et al failed to specifically teach the use of cloth of satin weave as set forth therein. However, the ramp material of Targiroff et al and the claimed invention share one common characteristic that is a frictional resistance material. Accordingly, it would have been a matter of design choice to substitute the polyurethane coated nylon of Targiroff et al with any equivalent frictional resistance material such as satin weave for the reason as set forth above.

Allowable Subject Matter

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 3-5, and 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3714

Claims 14-17 are allowed.
